AudaStation™

1 Install the AudaStation

1. Remove all tape and cardboard packing material.
2. Connect LAN terminal on the AudaStation to your network using supplied network cable.

Note To ensure optimum security, Audatex requires that your AudaStation be installed behind your router's firewall. Consult your router's installation documentation and/or network provider for setup information.

---

3. Connect power cord to the AudaStation.
4. Plug in power supply to an AC outlet, surge protector, or uninterruptible power supply (UPS).
